DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a floating gate memory array having split gate read transistor and split gate program transistor memory cells, classified in class 365, subclass 185.10.
 - II. Claims 12-14 and 39-41, drawn to a method for re-write if disturbed, classified in class 365, subclass 185.22.
 - III. Claims 15-38, drawn to a memory array having even and odd addressed cells, classified in class 365, subclass 230.04.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as using memory cells having a split gate read transistor and a split gate program transistor for reading and programming data and invention III has separate utility such as addressing memory cells by using odd and even rows of memory cells. See MPEP § 806.05(d).

Inventions "I and III" and "II" are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially

different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process for re-write if disturbed as claimed can be practiced with another different materially product such as a memory device having a page buffer and reading, erasing programming and verifying circuits.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, different search and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Huan Hoang whose telephone number is (571) 272-1779. The examiner can normally be reached on Mon-Fri 8:30AM-5:00PM.
